

MIDTOWN CHILDCARE CONSULTING SERVICES

As early childhood centers are returning to full operation after COVID-19 there will be many challenges to overcome. **MIDTOWN Childcare Consulting Services** can guide you through these challenges to ensure a successful and profitable center moving forward.

As a second generation owner of an early childhood center since 1978, I understand the challenges of managing the day to day operations of a childcare center. As Directors we easily get lost in the day to day operations and may lose sight of the larger picture. As a result key components of the center may fall by the wayside.

At Midtown we provide childcare centers with business solutions for the critical operations that need attention. We provide solutions to increase profits, recruit and retain quality staff, increase and manage your enrollment as well as other areas so your center can provide a quality early childhood education program.

Our services will guide you through the everyday challenges of operating a quality program or the rigorous requirements of opening a new center. We can provide services that range from policy creation to land acquisition and licensure approvals. You will receive one on one consultation services that provide you with a tailored approach to quality using the necessary tools to expand and grow your program.
